

**Dr Chris Elliott, Director**  
***Pitchill Consulting Ltd***

Dr Chris Elliott is a system engineer and barrister. He's a Fellow of the Royal Academy of Engineering and author of its guidance on system engineering 'Creating systems that work'. He spent the first 20 years of his career building the company that became Detica, then left to qualify as a barrister and practice in public and environmental law.

That led to developing a consulting practice that bridges engineering and law, helping companies and governments deal with clashes between technology and regulation. He has worked with railways in the UK, EU and Middle East, construction, medical devices and defence. He was retained by BAE Systems to help with a review of its approach to the management of product safety, drawing on the insights provided by the Haddon-Cave report.
